

Squirrel Class

Key Learning - Spring 1

Our core question this half term is:

What happens when it's cold?

How you can help me at home:

- Go for a winter walk and talk about what you can see.
- Practice subitising. Roll a dice and say which number is being shown on the dice without counting.
- Make ice-cubes and then see what happens as they melt.
- Encourage your child to become independent with putting on their coats, socks and shoes.

New skills I will develop:

- Developing independence and trying something myself before asking for help.
- Drawing pictures and talking about what I have drawn.
- Counting the syllables (beats) in different words.
- Talking about things I observe in the natural world, including how ice changes and what happens during the winter.

Reading:

Books you might like to read at home which link to our learning (these can be found at the library!):

Maths:

Subitising amounts to 3.

Counting objects by touching each item slowly as we say the number name, knowing the last number we say is the total

Things to remember each week:

Wednesdays - visit the woods (please bring wellies)

Thursdays - Please return library books

Fridays - PE
